New Eco-Friendly Health Therapy

Daytona Beach, FL December 2, 2009 – NewAgeTouch Therapeutic Massage Clinic offers new Eco-Friendly Bamboo Fusion™ used to instantly relax , tone and melt the stress from your body. Bamboo Fusion™ is an exotic new modality that is extremely relaxing, therapeutic, and promotes well-being.

In November, NewAgeTouch sent one of our Licensed Massage Therapists to be certified in Bamboo Fusion™ and she is sharing her knowledge with our staff.

Bamboo Fusion™ is a new modality that was developed in 2004 by Nathalie Cecilia, LMT who is originally from France. Nathalie developed bamboo tools to allow her to do deep tissue massage consistently without damaging her own hands. Nathalie went one step further by developing tools then heating them before applying to the body which allows for additional therapeutic healing to take place. The reason for using Bamboo in the design of these tools allows for them to be light weight, eco-friendly renewable resource of wood, and holds therapeutic heat for an extended period of time.

At NewAgeTouch our therapists do not charge additional fees to incorporate Bamboo in either a Swedish or Deep Tissue Therapeutic Massage. Bamboo Massage has been useful in the art of relaxation as well as Therapeutic Pain Management. Clients that have already received this

therapy report improvements in skin tone, prolonged pain relief and improvement in their well being and diminished pain in day to day chores.

Just recently NewAgeTouch has expanded and relocated to a larger facility at 240 Ridgewood Ave in Holly Hill Florida. This move affords NewAgeTouch additional treatment space and expanded services. Additional information about bamboo massage and other services offered by NewAgeTouch can be found on our website www.newagetouch.com.

For additional information contact Therese Leeds, LMT at 386-492-2958.
